AUTHOR INDEX

Barker, R. H.
Pyrolysis and Combustion of Polyester. Part II. Effect of Triphenylphosphine Oxide as a Flame Retardant, p. 165.

Pyrolysis and Combustion of Polyester. Part III. Brominated Fire Retardants in Poly(ethylene Terephthalate), p. 222.

Benerito, R. R.
Emulsions of Flame-Retardant Reagents for Cotton/Polyester blends, p. 59

ESCA Determination of Trivalent Phosphorus at Various Stages of Flame-Retardant Finishing of Cotton, p. 112.

Beninate, J. V.
THRPH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Berni, R. J.
Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Bostic, J. E.
Pyrolysis and Combustion of Polyester. Part II. Effect of Triphenylphosphine Oxide as a Flame Retardant, p. 165

Brady, D. G.
Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Brauman, S. K.
Phosphorus Fire Retardance in Polymers. I. General Mode of Action, p. 18

Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Phosphorus Fire Retardance in Polymers. III. Some Aspects of Combustion Performance, p. 93

Calve, L.
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Constant, L. A.
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Cukor, P.
Light Stability Screening Test for Fire Retardant Plastics, p. 183

Cummings, H. J.
Fire Retardants, Toxicity, and Flash Fire Propensity, p. 259

Donaldson, D. J.
Effect of Selected Alkali-Metal Salts on the THPC-Urea Flame Retardant Cotton Finish, p. 123

Drake, Jr., G. L.
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Effect of Selected Alkali-Metal Salts on the THPC-Urea Flame Retardant Cotton Finish, p. 123

Drews, M. J.
Pyrolysis and Combustion of Polyester. Part III. Brominated Fire Retardants in Poly(ethylene Terephthalate), p. 222

Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

SUBJECT INDEX

Blends
Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Borate Esters
Vapor Phase Deposition of boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242

Borax
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. I. Static Atmosphere, p. 73

Boric Acid
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. I. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242

Brominated Fire Retardants
Pyrolysis and Combustion of Polyester. Part III. Brominated Fire Retardants in Poly(ethylene Terephthalate), p. 222

Bromine
Emulsions of Flame-Retardant Reagents for Cotton/Polyester blends, p. 59

Catalysts, Flame-Retardants
Effect of Selected Alkali-Metal Salts on the THPC-Urea Flame Retardant Cotton Finish, p. 123

Char
Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Children Sleepwear
THPOH-NH_3 (Flame Retardant: Its Effect on Cotton Blends, p. 5

Chlorine Bleach-Resistant
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Combustion
Phosphorus Fire Retardance in Polymers. III. Some Aspects of Combustion Performances, p. 93

Corrosion Resistant Resins
Corrosion Resistant Resins Made by Resin Blending, p. 137

Cotton
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Cotton Blends
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Cotton Fibers
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 1. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242

Cotton, Flame-Retardant
ESCA Determination of Trivalent Phosphorus at Various Stages of Flame-Retardant Finishing of Cotton, p. 112

Effect of Selected Alkali-Metal Salts on the THPC-Urea Flame Retardant Cotton Finish, p. 123

Effect of Alkaline Treatment on the Flame-Resistance of Finished Polyester/Acetylated Cotton, p. 209

Cotton/Polyester Blends
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Curing
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Degradation Products
Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Degradation Rates
Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Dibromoneopentyl Glycol
Corrosion Resistant Resins Made by Resin Blending, p. 137

Dicyandiamide
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Doc Test
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Emulsions
Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Ethyl Borate
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 1. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 2. Dynamic Atmosphere, p. 242

Fabric Construction
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Finishing
Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Fire-Retardance Mechanisms
Phosphorus Fire Retardance in Polymers. I. General Mode of Action, p. 18

Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Phosphorus Fire Retardance in Polymers. III. Some Aspects of Combustion Performance, p. 93

Fire Retardants, Flash Fire Propensity
Fire Retardants, Toxicity, and Flash Fire Propensity, p. 259

Fire Retardants, Toxicity
Fire Retardants, Toxicity, and Flash Fire Propensity, p. 259

Fire-Retardant Systems
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Flame Retardants
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Effect of Selected Alkali-Metal Salts on the THPC-Urea Flame Retardant Cotton Finish, p. 123

A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192
Corrosion Resistant Resins Made by Resin Blending, p. 137

Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Pyrolysis and Combustion of Polyester. Part II. Effect of Triphenylphosphine Oxide as a Flame Retardant, p. 165

Light Stability Screening Test for Fire Retarded Plastics, p. 183

FR-1540
Corrosion Resistant Resins Made by Resin Blending, p. 137

Intumescent
Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Laundering
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Leach Resistance
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Lumber
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Melamine
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Methyl Borate
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 1. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242

Nitrogen Compound
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Non-Dripping
Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Organophosphorus
A Chlorine Bleach Resistant Durable Flame-Retardant Finish for Cotton Based on Chloromethyl Phosphonic Diamide, p. 192

Oxygen Index
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Phosphorus
Phosphorus Fire Retardance in Polymers. I. General Mode of Action, p. 18

Phosphorus Fire Retardance in Polymers. II. Retardant-Polymer Substrate Interactions, p. 38

Emulsions of Flame-Retardant Reagents for Cotton/Polyester Blends, p. 59

Phosphorus Fire Retardance in Polymers. III. Some Aspects of Combustion Performance, p. 93

Physical Properties, Flame-Retarded Polypropylene
Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Polyester/Acetylated Cotton
Effect of Alkaline Treatment on the Flame-Resistance of Finished Polyester/Acetylated Cotton, p. 209

Polyester, Pyrolysis and Combustion
Pyrolysis and Combustion of Polyester. Part II. Effect of Triphenylphosphine Oxide as a Flame Retardant, p. 165

Polyester Resins
Corrosion Resistant Resins Made by Resin Blending, p. 137

Polymers, Fire-Retardant
Light Stability Screening Test for Fire Retarded Plastics, p. 183

Polypropylene
Intumescence: A Novel Effective Approach to Flame Retarding Polypropylene, p. 150

Screening Test, Light Stability
Light Stability Screening Test for Fire Retarded Plastics, p. 183

Smolder Resistance
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 1. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242

THPOH-NH_3
THPOH-NH_3 Flame Retardant: Its Effect on Cotton Blends, p. 5

Triphenylphosphine Oxide
Pyrolysis and Combustion of Polyester. Part II. Effect of Triphenylphosphine Oxide as a Flame Retardant, p. 165

Urea
Curing and Fixation of Amino-Resin Fire Retardants, p. 235

Vapor Phase Deposition
Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters. 1. Static Atmosphere, p. 73

Vapor Phase Deposition of Boric Acid on Cotton Fibers via Borate Esters: 2. Dynamic Atmosphere, p. 242
